## 1. Introduction

This coursework intended to provide us with the abilities and expertise needed to conceptualise, design, and modify webpages that not only met, but exceeded, user expectations. From colour schemes and style to responsive layouts and interactive aspects, every piece of our design was carefully designed to improve the user experience as a whole. We improved our skills at blending both design and functionality via hands-on projects and practical exercises, resulting in comprehensive digital worlds that engage and satisfy those across several platforms and devices.

We look back on our web design journey in this report, sharing our steps, obstacles we faced, and successes we had. We show our final creations, which each reflect a unique blend of inventiveness, imagination, and skill, as a way to demonstrate the outcome of our work. We also go into the methods and approaches used, providing an understanding of the decision-making processes that informed our design decisions.

Overall, our web design classes helped us grow by teaching us a deep respect for the art and science of web design and giving us the skills to become skilled designers who can make a real difference in the digital world.

### 1.1 Team Members and Task Allocation

## 1.2 Website topic/theme

Our website is centred on the idea of "Good Health and Well-being," which is extremely important in today's culture. Our team's goal with this website is to promote complete health for people of all ages, focusing on physical, mental, and emotional wellbeing. We want to encourage users to prioritise their health and make educated lifestyle decisions by providing educational content, engaging assets, and interactive tools.

## 1.3 Contributions

| 1                         | Date & Time        | 27th February 2024                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|                           | Objective:         | Selecting a theme and aesthetic for the website's design                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|                           | Attended:          | Eamin, Salvador, Ali                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|                           | Your Contribution: | I was in charge of organising the schedule for our first meeting. Recognising the significance of defining clear goals and making the most of our time together, I carefully planned out the subjects we needed to cover, such as coming up with concepts, assigning roles and duties for our chosen theme, and creating a timetable for our project objectives. By proactively designing our meeting agenda, I ensured that our team stayed focused and productive, laying the groundwork for our future joint initiatives. |
| 2                         | Date & Time:       | 5th March 2024                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                           | Objective:         | Choosing upon colours, symbols for the logos, and design components                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|                           | Attended:          | Eamin, Salvador, Ali                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|                           | Your Contribution: | I made sure that when it comes to choosing colours, we all implement the same one so our website looks more balanced and professional. We decided to go with a light blue and light green colour to show the significance of good health and wellbeing and I ensured everyone implements this colour into their page for the website.                                                                                                                                                                                        |
| 3                         | Date & Time:       | 12th March 2024                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|                           | Objective:         | Distribute tasks and due dates to the team participants                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|                           | Attended:          | Eamin, Salvador, Ali                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|                           | Your Contribution: | I initiated on the task of researching best practices and design trends relevant to our selected topic of excellent health and well-being. By remaining up to date on the latest standards and upcoming developments, I was able to contribute significant insights and ideas to improve the overall visual appeal and user experience of our website. For example, on the content page, I picked the topic of physical fitness and was able to discuss it well thanks to my study.                                          |
| 4                         | Date & Time:       | 19th March 2024                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|                           | Objective:         | Handling questions or queries that came up for the coursework                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

|   |                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|   | <b>Attended:</b>          | Eamin, Salvador, Ali                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|   | <b>Your Contribution:</b> | Throughout our curriculum, I was responsible for conducting problem-solving sessions. Whenever problems or queries emerged, I promoted open communication among team members and supported brainstorming sessions to create innovative solutions. I created a collaborative environment such that everyone felt comfortable expressing their thoughts and opinions. Furthermore, I strongly requested feedback from team members in order to benefit from their different perspectives and skills in developing successful solutions. We kept constant communication via our WhatsApp group chat, allowing us to resolve any issues quickly and keep our project on schedule. |
| 5 | <b>Date &amp; Time:</b>   | 26th March 2024                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|   | <b>Objective:</b>         | Making sure each members tasks are finished                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|   | <b>Attended:</b>          | Eamin, Salvador, Ali                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|   | <b>Your Contribution:</b> | During the last meeting, I took responsibility for completing a thorough assessment of all completed tasks to make sure they matched the needed criteria. This entailed thoroughly reviewing every aspect of our website, including design aspects, content correctness, performance, and the general user experience. I gave positive comments to team members, providing advice on places for development and recognised their accomplishments.                                                                                                                                                                                                                             |

### 3. Technical Discussion

#### 2.1 Implementation

##### Student 2 Technical Discussion: 1. Homepage Implementation.

##### Approach:

**1.1 Layout Design:** Using HTML and CSS, I created a visually appealing homepage layout that prioritised readability and user interaction.

**1.2 Material Integration:** I have also Included appropriate material about the effort for excellent health and well-being, which is consistent with the website's subject and aims.

**1.3 JavaScript Enhancement:** With the use of JavaScript being implemented within this code, this has allowed me to add interactive components to the homepage, which incorporates picture sliders, hover effects, and smooth scrolling to improve user engagement and navigation.

**1.4 Styling:** I used CSS to style components including headers, paragraphs, photos, and navigation bars to improve the homepage's aesthetics and usability.

      <h1>Welcome to Our Initiative for Good Health and Well-being</h1>
      <p>This website is dedicated to promoting well-being for all at all ages, in line with the United Nations Sustainable Development Goals. At the core of what we do, we think that promoting well-being is an essential human right, instead of just an objective. With a wide range of programmes, materials, and cooperative efforts, we work to enable people and communities all around the world to live wholesome, happy lives. Our commitment to tackling the interrelated issues of poverty, inequality, and degradation of the environment, and other related concerns is demonstrated by our alignment of our mission with the United Nations Sustainable Development Goals. Let's work together to create a future in which everyone, from all backgrounds and situations, has the chance to prosper.</p>

}

requestAnimationFrame(scrollAnimation);
}
});
</script>
</body>
</html>

```

## Screenshot of Homepage output

## Student 2 Technical Discussion: 2. Feedback form Implementation.

### 2.1 Form Structure

Approach: I started by constructing the feedback form in HTML. The form's sections, including Contact Information, Website Feedback, Future Visits, and Feedback Details, were organised into components to organise the input fields together. This method improves the overall structure and readability of the form.

The form's organised layout provides an organised and simple presentation of information, enhancing the user interaction. Grouping relevant areas streamlines navigation and allows visitors to easily find and offer comments on various elements of the website.

## 2.2 Validation:

Approach: I used JavaScript to improve data correctness and avoid mistakes during submission. Before enabling the form to be submitted, the `validate Form()` method ensures that all essential fields have been completed correctly. It also confirms the legitimacy of the email address given by the user.

Client-side form validation delivers quick feedback to users, minimising errors and boosting data quality. The validation procedure protects the reliability and effectiveness of input by alerting users to amend any inaccuracies before submission.

## 2.3 Confirmation Message:

Approach: After successfully submitting the feedback form, I included a confirmation message to provide a comforting acknowledgment to the user. The message, which is formatted using CSS to increase visibility, notifies the user that their feedback has been accepted.

Including a confirmation message reassures users that their input was properly submitted, avoiding inconsistency and improving the user engagement. This simple act of recognition builds trust and satisfaction, encouraging users to come back to the website in the future.

## 2.4 Preview Feature:

Approach: I used JavaScript to establish a preview section for people to check feedback before submitting it. The `showPreview()` method continually alters the preview sections with the user's feedback as they type. This feature offers users a real-time preview of their comments.

The preview option allows users to evaluate and validate feedback before final submission, increasing transparency and accuracy. Users can increase the quality of feedback by visualising their comments in context.

**Output of Feedback form**

The image shows a web form titled "Feedback Form" in blue text. It is divided into three main sections, each with a grey header bar:

- Contact Information:** Contains two text input fields labeled "Name \*" and "Email \*".
- Website Feedback:** Contains four items:
  - A dropdown menu labeled "Was this website easy to navigate? \*" with "Please select" as the placeholder.
  - A text input field labeled "How satisfied are you with our website? (0-10) \*".
  - A dropdown menu labeled "Was this your first time visiting? \*" with "Please select" as the placeholder.
  - A text area labeled "What do you think we can improve or add onto our website?".
  - A text area labeled "Did you encounter any technical problems or bugs while using the website?".
- Future Visits:** This section is visible at the bottom but contains no visible content.

## Student 2 Technical Discussion: 3. Content page Implementation

### 3.1 Page Structure

Approach: The content page was organised using HTML and divided into parts to ensure logical organisation. Each area includes detailed text and graphics linked to improving physical fitness.

Organising material into parts enhances accessibility and navigation, making it easier to understand information and identify relevant subjects of interest. This organised approach improves the viewer's experiences and interaction with the material.

### 3.2 Design and Style

Approach: To improve the content page's appearance, I used CSS style. This involved deciding on font styles, choosing background colours, arranging headers and photos, and enhancing the visual attractiveness of components via borders and shadows.

The selected stylistic components produce a unified, eye-catching design that supports the concept of physical fitness for good health and wellbeing. A smooth surfing experience is given to consumers by keeping the page's appearance consistent throughout.

### 3.3 The Top Button Scroll

Approach: I used JavaScript to add a scroll-to-top button to enhance user experience and make navigating easier. When a user scrolls down the page, a button displays to enable them to instantly return to the top with a single click.

The scroll-to-top button makes extensive content pages easier for visitors to browse, which improves usability. This function encourages visitors to browse the full page without worrying about navigation by making it easier to get back to the top.

<p>Physical fitness encompasses more than just the absence of disease or physical weakness. It involves the ability to perform daily tasks with vigor and alertness, without undue fatigue, and with ample energy to enjoy leisure-time pursuits and meet unforeseen emergencies.</p>
<p>An individual's level of physical fitness can be influenced by various factors, including genetics, lifestyle choices, and environmental factors. While genetics may play a role in predisposing individuals to certain physical traits, lifestyle choices such as regular exercise, proper nutrition, adequate sleep, and stress management can significantly impact one's overall fitness level.</p>
<p>Furthermore, physical fitness is not a static attribute but rather a dynamic and ongoing process that requires regular maintenance and adaptation. It involves a combination of cardiovascular endurance, muscular strength, flexibility, and body composition, all of which interact to determine an individual's overall fitness level.</p>
<p>In conclusion, prioritising physical fitness is essential for achieving good health and well-being. By incorporating regular exercise, proper nutrition, adequate rest, and stress management into your lifestyle, you can enhance your overall quality of life and reduce the risk of chronic diseases. Remember, physical fitness is not just a goal to achieve but a journey to maintain lifelong health and vitality.</p>

## Student 2 Technical Discussion: 4. Page Editor Implementation

### Method of Implementation:

**4.1 Page Structure and structure:** I used HTML to create the Page Editor page, making sure it had a clear, understandable structure for simple navigation. The header, a section showing the job information, and a footer with connections to related pages make up the page structure.

**4.2 Styling and Presentation:** I used CSS for styling in order to produce an aesthetically pleasing interface that aligned to the website's design language. I gave readability and design first priority while selecting the right fonts, colours, and layout.

**4.3 Task information Display:** I organised a list to clearly show the given tasks in order to satisfy the criterion of presenting task information. To ensure thorough coverage of the Page Editor's contributions, each job includes a description of the position and the accomplished duties.

### Justification:

**4.4 User-Friendly Interface:** By providing a simple and well-organized interface, the design places a high priority on the user experience. This makes it easier to navigate the team

project effectively and to comprehend the Page Editor's responsibilities.

**4.5 Consistent stylistic:** I ensured visual coherence by following consistent stylistic guidelines throughout the website, including the Page Editor page. Maintaining consistency across design aspects increases user engagement and trust by projecting a feeling of professionalism and dependability.

**4.6 Task Overview:** Giving the Page Editor's tasks an organised summary promotes responsibility and openness among team members. Having a clear understanding of roles and duties among team members stimulates teamwork and guarantees that everyone is working towards the same goals.

**4.7 Accessibility Considerations:** I used responsive design strategies and structural HTML components to prioritise accessibility throughout the development process. This guarantees that users of all skills and devices may access the Page Editor page.

### Challenges I encountered within this coursework

While working on this coursework, I had several challenges, but one that stood out was when I had to put the feedback form into practice. Careful consideration of client-side validation was necessary while creating an efficient feedback form to guarantee data completeness and correctness. I had to make multiple checks for the feedback form to ensure it met the criteria, so it allows me to achieve the highest marks. To achieve the highest marks for the feedback form, I added extra styles and headers to the form so it makes the feedback form stand out and look professional.

### 2.2 Task completion checklist

As Student 2, I have effectively finished the assignments given to me to carry out. To start, I designed the site with a priority on style, content, and layout to provide a compelling user experience. Second, to efficiently gather insightful input and promote user involvement, I created a feedback form. Thirdly, I carefully researched and created the material for the physical fitness content page, which I wrote to encourage health and well-being. Every assignment was executed with meticulous attention to detail, leveraging HTML, CSS, and JavaScript approaches to meet specifications. Form validation and visual coherence were two challenges that were resolved using cooperation, resource management, and problem-solving. Below, I have created a task completion checklist in the form of a table to better display and describe the tasks I have completed as part of this coursework.

| Student 2 Tasks   | Completed |    |              | Student Comments                                                                                                                                                                                                                                                                  |
|-------------------|-----------|----|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                   | Yes       | No | Partial<br>y |                                                                                                                                                                                                                                                                                   |
| 1 –Homepage       |           |    | ✓            | When it came to completing the homepage, I think I partially completed it because when it came to adding in my group members work onto the homepage, I found that tricky, but other than that, I feel I have met every other criteria for creating the homepage.                  |
| 2 – Feedback Form | ✓         |    |              | I spent a lot of time on the feedback form, making sure it includes the necessary components needed, such as the preview section, validation, checks for error, styles and so forth. By spending a lot of time and making constant checks, I believe I have completed this fully. |

|                                                                                          |   |   |   |                                                                                                                                                                                                                                                                                                                                   |
|------------------------------------------------------------------------------------------|---|---|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3 – Content page                                                                         | ✓ |   |   | The content page also took me some time to make but eventually I got there and made sure it is fully completed, meets the criteria's spoken about in the brief and make sure it looks and functions professionally.                                                                                                               |
| 4 – Page Editor                                                                          | ✓ |   |   | The page editor is completed with additional styles and displays the links of the tasks I have completed underneath.                                                                                                                                                                                                              |
| 5 – Provide the navigation bar and utilise it in all pages (adapted)                     |   |   | ✓ | The navigation bar is partially completed, its displayed onto the website, but once you click on it, it doesn't take them to the page. I found it challenging implementing this.                                                                                                                                                  |
| 6 – Provide the template for the website and utilise the template to all pages (adapted) | ✓ |   |   | I've finished putting the website template into practice on every page. Now, every page follows an identical format, guaranteeing uniformity across the website.                                                                                                                                                                  |
| 7 – Additional CSS                                                                       | ✓ |   |   | The CSS has been finalised. To ensure that each web page on my website has the identical consistency as the others, I have included enough aesthetic components on each page.                                                                                                                                                     |
| 8 – Additional Interactivity                                                             | ✓ |   |   | All of the website's colours are included in the package, including the light green background for the feedback form and the light blue header and light green background for the homepage and content page. I think the colour scheme is relevant to the subject we covered, therefore I combined these two colour combinations. |
| 9 – Uploaded to Web Server                                                               | ✓ |   |   | The pages I have implemented, they have been uploaded onto the university server as a link and they are located at the beginning of the report.                                                                                                                                                                                   |
| 10 – Created and used GitHub                                                             |   | ✓ |   | I haven't used GitHub as I didn't know how to work this out.                                                                                                                                                                                                                                                                      |

## 4. Webpage Validation Statement

```

I have used a validation service system with extreme caution to make sure all of my code scripts are fully functioning and fulfil the highest usability criteria. I have gone to considerable lengths to ensure that every component of the codebase is accurate and functional, as the screenshot I have shared as an example for one of my codes illustrates. This thorough evaluation procedure improves the website's accessibility and usability, in addition to ensuring that it functions without a hitch. To maximise the project's overall quality, I have carefully examined every line of code to remove any potential flaws or inconsistencies.

## 5. Janet

I've done a few steps on my website to make sure it complies with Janet Policies, Regulations, and Legal Requirements. First and foremost, I have ensured that every webpage is created with availability in mind, adding structured markup for screen readers, appropriate HTML structure, and alternate text for pictures. In order to comply with data protection rules, I have also developed a privacy policy that informs users about the gathering and processing of their personal information. In addition, I manage user data carefully by encrypting data during transmission and storage and making sure that any information utilised on the website adheres with copyright laws. Along with implementing security measures against common online vulnerabilities and providing a thorough conditions of Service agreement that outlines use conditions, I've also conducted frequent compliance checks to make sure that rules and policies are being followed. All of these initiatives are meant to give users of my website a secure, easily navigable, and legally compliant experience.

## 6. Self-reflection

State what you enjoyed and did not enjoy about teamwork

I enjoyed doing group meetings with my members and discussing different aspects of this coursework, such as picking the overall topic of our website. During the meetings, it was easy to communicate with each group member, we understood each other well and that's what made communication better and more enjoyable. When speaking about something I didn't enjoy, I can't really speak about much because I feel I didn't experience any negative experiences. But maybe if we all stayed the same pace when it came to completing work, it would have been a better experience, nonetheless, I didn't have much things I didn't enjoy.

**State what you learned about teamwork**

Working in a group has taught me to make sure that we are moving forward together as well as individually. We had certain members of the group who took an extended period to complete their tasks because it was a collective project, which made it more difficult to go on with the job. Thus, based on what I've learned, if you work in a group to accomplish a project, always make sure that after finishing your duties, you strive to assist others and ensure that they are moving forward with you as well, making the group project completion progress quicker and more efficient.

**State what skills you gained/learned from undertaking the project**

Similar to what I spoke about before, by learning the lesson of completing your task and trying to help others for better project completion, after finishing my tasks, I attempted to make sure everyone else finished their tasks by giving them ideas on what they could add or change onto their webpage to ensure their work is balanced with all group members. In conclusion, I feel like my overall teamwork and collaborating skills have improved from undertaking this project.

**State any strengths about yourself that emerged whilst undertaking the project**

One key strength I implemented was good communication skills. I feel like I showed this particular skill consistently during meetings. As I mentioned before, the communication was easy, and we understood each other well, which led to me being confident with each group member. I managed to share all my concerns and queries with ease.

**State any weaknesses about yourself that emerged whilst undertaking the project**

One weakness I had while completing this project was putting everyone's work into the navigation bar for the homepages. I had no issue creating the navigation bars, but one thing I struggled with was putting it all together, I still need to develop this weakness and hopefully I can learn from it in the future.

**State how you would do things better if you were to undertake the project again**

The next time, I would have discussed further with my group members about combining all of the work, and not only that, I would have made sure that I learned from the previous weakness I mentioned, which was combining all of the work into the homepage navigation bar.

**Additional general or project specific comments**

I don't have any additional general or project-specific comments, however, one thing I would like to make sure of in the future is to develop from the weaknesses I have stated above,

and hopefully, by developing those weaknesses, I will be able to complete similar projects to this with ease, so I must make sure I consider learning from my mistakes to get a better understanding of the web design and development field.

    <h1>Welcome to Our Initiative for Good Health and
Well-being</h1>
    <p>This website is dedicated to promoting well-being for all
at all ages, in line with the United Nations Sustainable Development
Goals. At the core of what we do, we think that promoting well-being is
an essential human right, instead of just an objective. With a wide
range of programmes, materials, and cooperative efforts, we work to
enable people and communities all around the world to live wholesome,
happy lives. Our commitment to tackling the interrelated issues of
poverty, inequality, degradation of the environment, and other related
concerns is demonstrated by our alignment of our mission with the
United Nations Sustainable Development Goals. Let's work together to
create a future in which everyone, from all backgrounds and situations,
has the chance to prosper.</p>

    <div class="PhysicalFitness">
      
    </div>
    <div class="description">
      <div class="text-box">
        <p>In today's fast-paced world, prioritizing physical fitness is crucial for maintaining overall health and well-being. This content page delves into various aspects of physical fitness, offering insights, tips, and techniques to help you embark on a journey towards a healthier lifestyle.</p>
        <p>Physical fitness encompasses more than just the absence of disease or physical weakness. It involves the ability to perform daily tasks with vigor and alertness, without undue fatigue, and with ample energy to enjoy leisure-time pursuits and meet unforeseen emergencies.</p>
        <p>An individual's level of physical fitness can be influenced by various factors, including genetics, lifestyle choices, and environmental

```

factors. While genetics may play a role in predisposing individuals to certain physical traits, lifestyle choices such as regular exercise, proper nutrition, adequate sleep, and stress management can significantly impact one's overall fitness level.</p>

<p>Furthermore, physical fitness is not a static attribute but rather a dynamic and ongoing process that requires regular maintenance and adaptation. It involves a combination of cardiovascular endurance, muscular strength, flexibility, and body composition, all of which interact to determine an individual's overall fitness level.</p>

<p>In conclusion, prioritizing physical fitness is essential for achieving good health and well-being. By incorporating regular exercise, proper nutrition, adequate rest, and stress management into your lifestyle, you can enhance your overall quality of life and reduce the risk of chronic diseases. Remember, physical fitness is not just a goal to achieve but a journey to maintain lifelong health and vitality.</p>

## Appendix E: Task Completion Checklist

| Student 2 Tasks                                                                          | Completed |    |           | Student Comments                                                                                                                                                                                                                                                                                                                  |
|------------------------------------------------------------------------------------------|-----------|----|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                          | Yes       | No | Partially |                                                                                                                                                                                                                                                                                                                                   |
| 1 –Homepage                                                                              |           |    | ✓         | When it came to completing the homepage, I think I partially completed it because when it came to adding in my group members work onto the homepage, I found that tricky, but other than that, I feel I have met every other criteria for creating the homepage.                                                                  |
| 2 – Feedback Form                                                                        | ✓         |    |           | I spent a lot of time on the feedback form, making sure it includes the necessary components needed, such as the preview section, validation, checks for error, styles and so forth. By spending a lot of time and making constant checks, I believe I have completed this fully.                                                 |
| 3 – Content page                                                                         | ✓         |    |           | The content page also took me some time to make but eventually I got there and made sure it is fully completed, meets the criteria's spoken about in the brief and make sure it looks and functions professionally.                                                                                                               |
| 4 – Page Editor                                                                          | ✓         |    |           | The page editor is completed with additional styles and displays the links of the tasks I have completed underneath.                                                                                                                                                                                                              |
| 5 – Provide the navigation bar and utilise it in all pages (adapted)                     |           |    | ✓         | The navigation bar is partially completed, its displayed onto the website, but once you click on it, it doesn't take them to the page. I found it challenging implementing this.                                                                                                                                                  |
| 6 – Provide the template for the website and utilise the template to all pages (adapted) | ✓         |    |           | I've finished putting the website template into practice on every page. Now, every page follows an identical format, guaranteeing uniformity across the website.                                                                                                                                                                  |
| 7 – Additional CSS                                                                       | ✓         |    |           | The CSS has been finalised. To ensure that each web page on my website has the identical consistency as the others, I have included enough aesthetic components on each page.                                                                                                                                                     |
| 8 – Additional Interactivity                                                             | ✓         |    |           | All of the website's colours are included in the package, including the light green background for the feedback form and the light blue header and light green background for the homepage and content page. I think the colour scheme is relevant to the subject we covered, therefore I combined these two colour combinations. |

|                              |   |   |  |                                                                                                                                                 |
|------------------------------|---|---|--|-------------------------------------------------------------------------------------------------------------------------------------------------|
|                              |   |   |  |                                                                                                                                                 |
| 9 – Uploaded to Web Server   | ✓ |   |  | The pages I have implemented, they have been uploaded onto the university server as a link and they are located at the beginning of the report. |
| 10 – Created and used GitHub |   | ✓ |  | I haven't used GitHub as I didn't know how to work this out.                                                                                    |
